WIDE RANGE OF MACHINERY AND SPARE PARTS

## ***WE SELL ALL BRANDS***

---

Our company is based in Värmland, western Sweden. The business idea is mainly to sell used forestry machines and spare parts. However, our extensive product range also includes new parts and accessories.

### **50 YEARS IN THE INDUSTRY**

At Koppom Maskin you find the wide selection and the knowledge you need. We assure you that we keep ourselves updated and have a wide selection of machines. We feel well suited to the future in a global market place. Around 60-70 percent of our sales come from export.

### **OUR OWN BRANDS**

Many years of experience have transformed into ideas for developing our own products. We have created the KM PARTS series, covering accessories like computers, tubes, actuators, lights, windows, and much more. Tracks and chains of the XL TRACTION brand, developed and tested together with our production unit, give you both product and price benefits.

### **NEW THIS YEAR**

Within KM PARTS we expand the KM TECH product line. With a fully equipped workshop and three employees for the task, we can offer a restored and tested exchange unit when your current one gives you trouble. You minimize your downtime. To increase your options we have also developed our own computers, compatible with most control systems. Contact us for more information.

### **WE PROVIDE WHAT YOU NEED**

Our employees are competent and enthusiastic on all levels of the company. Through an effective communication we can create business deals and cooperations. Let us give you a peek into our world and perhaps take the first step towards a future contact.

## ***TOMMY ABOUT KOPPOM MASKIN***

–We are always open for dialogue and appreciate the importance of security and trust. Long business relations have become somewhat of a strength for us.

During his 50 years and some in forestry Tommy has come to build a large "deposit" of experience and knowledge. Important is to serve the customer with quick deliveries, as downtime is very expensive in our industry. A substantial stock is a requirement.

–Our mission is always to provide the spare part or the machine requested by the client. It is important to rethink and stay active all the time. The customer expectations is our guiding star.

There were a lot of congratulations for Tommy Jorälv and Koppom Maskin as the 50th Anniversary of the company was celebrated in 2017. His family and employees, all involved in one way or another, celebrated with him.

## OUR STOCK - YOUR ADVANTAGE

We reuse 95 percent of the forestry machines dismantled and remaining oils, glycol, hoses, etc are sent to recycling. Koppom Maskin is the first Swedish company to be environmentally certified within dismantling forestry machines. We sell both used and new spare parts.

### CLOSE TO EVERYTHING

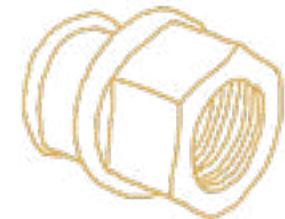

The demand of spare parts is extensive. We dismantle around 120-150 machines per year. They are often in good shape and from a later model. Mostly they come straight from forestry work without damages, which means they make good spare parts and meet a high market demand.

### PROPER METHODS

When a harvester or a forwarder arrives for dismantling it is necessary to plan it properly, start out in the right way and find practical solutions. The machines are always large and not simply to attack. All are different so it is challenging. We usually dismantle all protective gear, crane pillar and wheels, to lower the machine height. That makes it easier to finish the job.

### RAPIDITY IS CRUCIAL

Hundreds of thousands of articles are stocked, distributed over more than 40.000 m<sup>2</sup>. Time is money. Us having a quick support and knowing what is on stock, can be the deciding factors for your order placement.

### DIGITAL CATALOGS

Building a digital databas of the full spare parts range is an on-going and important task, meeting an ever expanding offering. The transition from a manual to a digital documentation with images is comprehensive, but revolutionizes our customer service.

TWO COMPANIES - ONE VISION

## *A COMPLETE SUPPLIER*

---

### **JUST ONE CALL**

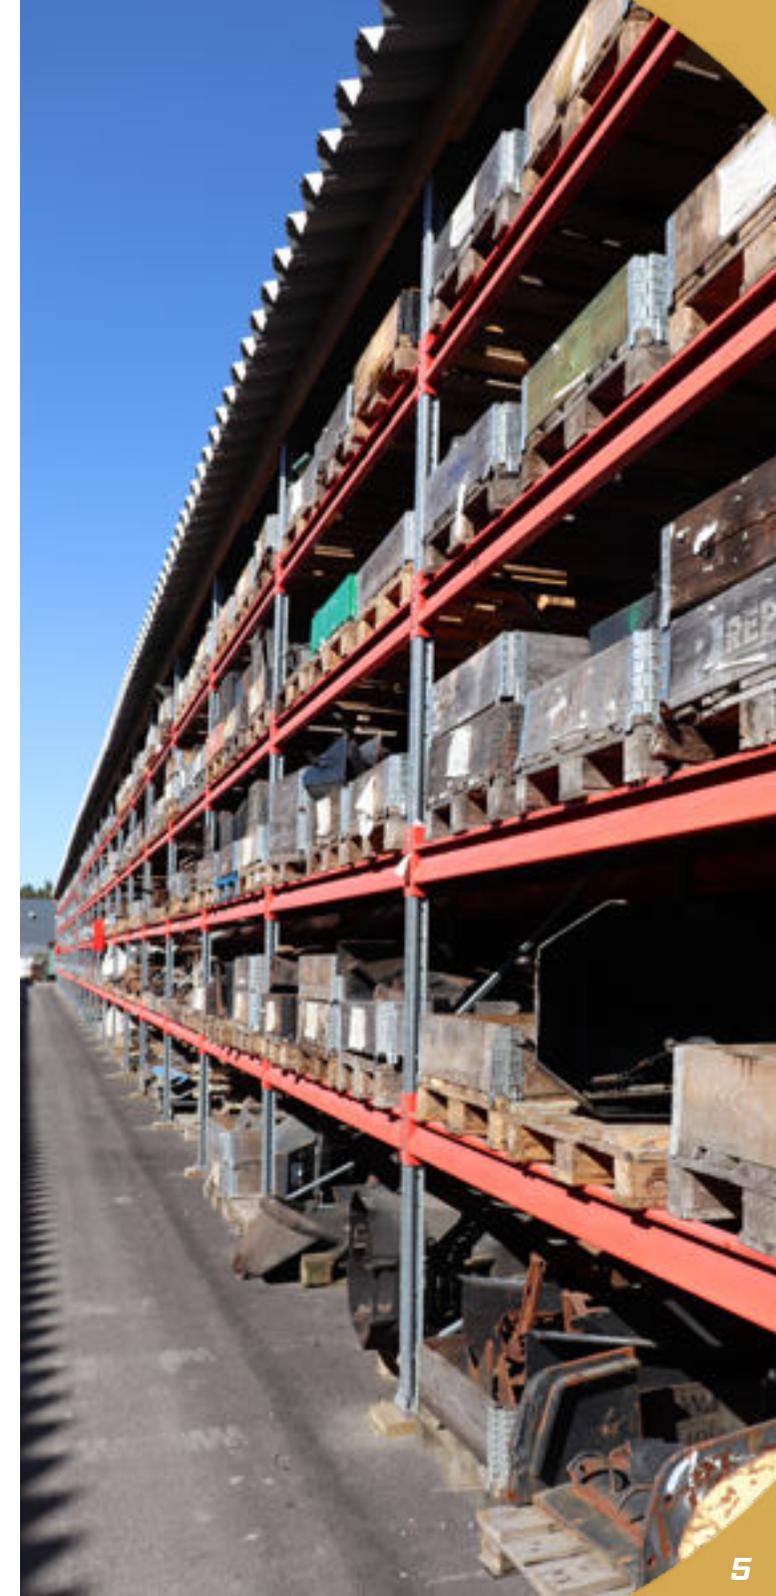

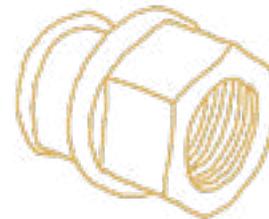

We want you to quickly find what you need and not have to call several suppliers. In our warehouse we have most of what you need for your machine - large or small.

Often you can choose between used or new. Our vision is to give you both options and to the best price either way.

In our large warehouses there are more than 7.000 pallets of spare parts and new buildings are being added as we go.

### **COOPERATION**

Tommy Jorälv does solely machine sales in his company Koppom Maskin AB. Oskar Jorälv sells both machines and spare parts in his company Koppom Maskin & Trä AB. All is done in a very close cooperation. In total we are a group of 35 employees.

Keeping our spare parts well organized is necessary to give you quick support.

The labeling system is meticulously built to give the right information to the person picking up or replenishing goods.

## *ORGANIZED & MAINTAINED*

Shipments leave here on a daily basis.

Five employees make sure the goods are ready to go.

If you order in the morning we normally ship in the afternoon.

Grapples

**C-hook  
30 mm**

The tracks and chains of our own brand XL TRACTION, have been tested and produced for Nordic conditions. During 15 years we have developed products to endure tough wear.

The forged C hook is 30 mm thick in the wear surface, which extends its' life time. The processed inner surface of the hook and a unique design eliminate the risk of slant wear to the link system. The material is high quality boron steel.

The chains are also made from boron steel for long life and stability. They come in two versions, STANDARD and the latter development PRO, which has better grip and lies more steadily on the tire.

We always have the most common types on stock - both chains and tracks. To find out more visit [www.xltraction.com](http://www.xltraction.com).

## THE SECOND GENERATION

# *SIBLINGS SIDE BY SIDE*

### SUCCESS FACTOR

—What usually gives good results is to be interested in what you do. Then you keep updated on the industry. Your commitment spreads to people around you - personnel, business partners and clients. And you get a better understanding of the clients' current needs.

### INTERNATIONAL GROWTH

—You were awarded for the strong international growth, what was the background?  
—We have always worked on a long term basis and with many years in the business we have good relations with the customers which makes them come back. Besides we have reached new customers with our ads and our sales team, thanks to their product and language skills.

### LOCAL GROWTH

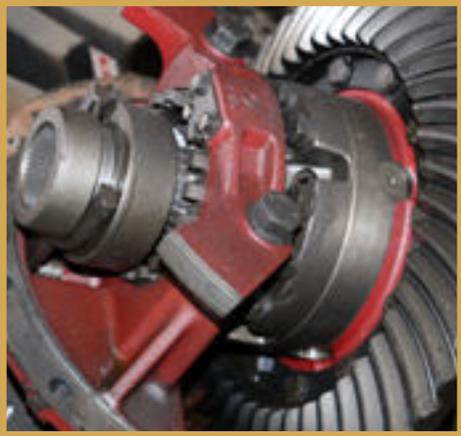

Always hunting for development, the company is expanding at a steady pace both in terms of personnel and premises. Currently an expansion of new land and construction of additional warehouses is about to take place.

—The more we can fit under roof, the better for the clients.

Most likely you will find Oskar outside around the machines. Brands, models, spare parts, strengths and weaknesses, preferred brands on different markets - you name it! Oskar will have an answer.

Linda keeps track of the figures. Since school age, she has taken care of the family business finances, salaries and some personnel matters. Her favourite task is book keeping.  
—A lot has happened since I started but the most important time saver is probably the internet bank.

We reserve the right to change or correct information without prior notice.
